iphone 7 Anyone can help with this?! A: Should be: `File tiffFile = new File("tiffFile.tif");` Not: A catheter is a medical tube that is used to guide fluid through the human body, to deliver medication, to remove debris or material and to monitor a patient's health. An end of the catheter is located outside the body, while the other end is located inside the body. Catheters are used in medical treatments for treatment, diagnosis, and monitoring of various diseases. They may be inserted into the body through any natural or artificial body opening or orifice. A common medical procedure that uses a catheter is the removal of a needle from the femoral vein. A typical IV (intravenous) catheter includes an outer tube (catheter tube), a hollow needle attached to one end of the catheter tube, and a hub attached to the other end of the catheter tube. The catheter tube has an outer surface and an inner surface. The catheter may be used to introduce medication into the body or to remove material from the body. The catheter may be inserted in a vein or a muscle in the body. A needle is attached to one end of the catheter tube so that a proximal end of the catheter tube is connected to a syringe. The catheter hub is used to connect the needle to the proximal end of the catheter tube. A typical intravenous catheter is a straight catheter having a circular cross section. A sharp hollow needle is attached to one end of the catheter tube, and a hub is attached to the other end of the catheter tube. Intravenous catheters may be used to carry fluid into the body or to carry fluid out of the body. Intravenous catheters may be inserted into a peripheral artery, such as the artery in an arm or a leg, or into a central vein, such as the azygos vein, the internal jugular vein or the subclavian vein. An intravenous catheter may be used to administer fluid, such as medication, to a patient. An intravenous catheter may also be used to remove blood or other fluid from the body. The fluid may be removed from the patient via a catheter positioned in a peripheral vein, or it may be removed from
