challenge is a competition run by the MathMavericks, an international non-profit  
organisation that fosters mathematics through events and workshops for children and adults.  
The MathMaverick challenge provides three prizes: a high-profile award for the individual,  
an award for the group and a great prize for the group who score the best on the challenge  
quiz. The challenge is designed to be a friendly competition where anyone with a creative  
mathematical mind can score maximum points, and where young people can compete in a  
fun way with their friends. As an added bonus, entrants get to attend the next MathMavericks  
event, and be given free tickets to another of their events for each friend they sign up. If you  
get four friends to sign up, you get a full day's free access to MathMavericks events! Entrants  
can sign up for the challenge from the MathMaverick website. Awards and prizes Individual  
Award: an internationally-recognised international award for the MathMaverick who scores  
the best score on the challenge quiz. Group Award: the winning team scores best on the  
challenge quiz. Great Prize: the winning team scores best on the challenge quiz and gets free  
access to a MathMavericks event. The challenge is available to children and adults who are  
14 or older. Sign up To sign up for the challenge, you'll need to create an account on the  
MathMaverick website. Follow the instructions to do this. Create your challenge quiz Once  
you're logged in, you'll be able to create a challenge quiz. This is a basic quiz that you can  
play against your friends, so you can get a sense of your maths ability before starting. You'll  
need to give the number of questions in the quiz, as well as the answers you want your friends  
to get. Add friends After you've created a challenge quiz, you can add up to five friends to  
the challenge. Each friend you add will have their own profile page and will be able to see all  
the information you've entered for your challenge. When you add friends, you'll get a  
notification with details of how you can invite them to the
